The new facility holds the capacity of installing up to 15 lines that can produce 15000 MT of u-PVC profiles per annum.

Talking about Profine’s future plans, Peter Mrosik, owner & CEO, Profine GmbH said, "We have been in the country for 12 years. With the new plant, we are taking another step and underline our long-term commitment to the growth market of India.”

The slump in the real estate market however has impacted the u-PVC industry as well. “Since the last one year, while the turnover is there, the credit period has increased,” said Khan. He however adds that reforms will only benefit the industry in the long term.
