PRESENTS

**WORLD OF
WINDOWS** 

POWERED BY

SCHÜCO

05th APR
TAJ VIVANTA
GUWAHATI

Architecture as a science tells us that there is more to space than just cementing building blocks together. Guwahati's fast developing skyline tells us that architects have long sought to communicate their craft through their buildings. Being one of the fastest growing cities in the country, modern pace and development have completely changed the face of this city and has made it an epitome of a new emerging India - restless and energized. As a result of the upcoming boom, with development being the key word, there's a lot to learn and experience in Assam's most dazzling city Guwahati. In this quest, we feature some of the most important and dynamic architects from Guwahati who, in their prime, are working their way one-building-at-a-time, to make our 'space for living' more exciting.

Addressing the performance and functional aspect of architecture and after successfully completing 14 editions in various cities of India, now Zak World of Windows comes in Guwahati and will be held at The Taj Vivanta on 5th April 2019.

The forum will aim at the proper understanding of fenestration and shall address the issues like design and application challenges, measuring the performance of windows and their affectivity in bringing life to the interior spaces. The experts from the respective fields will engage in a panel discussion debating some of the pressing technical issues vis-a-vis sustainability through windows, functionality and usability, etc. Not to be missed is the opportunity to explore finest new technologies and products, which will be on display and that shall help redefining the way windows are looked at.

Organized by Zak Trade Fairs & Exhibitions Pvt. Ltd, this will be a part of the build up to the mega exhibitions on Glass, Fenestration & Aluminium Extrusions to be held in Delhi from the 12 - 15 December, 2019.

As seating is limited, register your seats early and get to hear from the most illuminated minds of the industry. The seminar will be followed by networking dinner & refreshments.

TOP 3 REASONS WHY YOU SHOULDN'T MISS THE EVENT THIS YEAR

Hear the experts explain in details about the key components of perfect windows.

Listen to keynote speakers and window experts sharing their experience & knowledge on window engineering for sustainability & durability.

Interact with solution providers showcasing unique products such as high performance window systems in uPVC & Aluminium, precision hardware, sealing & installation technologies.
